BF Goodrich[®] Tires

features and benefits

- 1** Directional pattern.
Stability at high speed and remarkably low noise level.
- 2** Continuous central rib and maximised contact patch area.
Rapid and precise response to driver input together with directional stability.
- 3** Wide, deep central grooves.
Rapid and efficient water clearance for control in the wet.

- 4** Tread rubber compound.
Amazing grip in dry and wet conditions.

- 5** High performance casing and bead area.
Excellent handling in bends and absorption of surface irregularities.

- 6** Size and direction of lateral channels.
Grip on wet surfaces and low noise level.

- 7** Rounded shoulder profile.
Refines 'feel' at the limit and gives progressive handling in bends.
