

BFGoodrich[®]
Tires

Touring^G

From the Grip Attitude heritage, the **BFGoodrich Touring^G** is perfect for drivers of medium engine cars, either around town or on the open road.

The **directional** tread pattern design gives superb **stability** and **precision** on dry surfaces. The depth and direction of the lateral and central channels provides excellent **grip** and **braking efficiency** in the wet.

BFGoodrich Touring^G - because **Grip** is not only down to the car.

BF Goodrich® Tires

Features and benefits

ON DRY ROADS

- 1 **Reactivity :** 2 central ribs (3 for the larger sizes) give rapid and progressive response to driver input.
- 2 **Stability :** The shape and direction of the central ribs and shoulder blocks optimises the crown profile giving directional precision in bends and in straight lines.

ON WET ROADS

- 3 **Control :** The three circumferential grooves (4 for the larger sizes) together with the lateral and shoulder grooves give grip and control during cornering and on the straight.
- 4 **Grip :** The high grip tread rubber compound gives excellent grip on wet roads.
- 5 **Long life :** Good distribution of contact patch pressure gives even wear and long life.
